Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2-6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Murata et al (4,327,186).

Murata et al teach the mixing of silicon carbide particles and titanium diboride particles with a resin, which is dried and screened through an 80 micron screen, see example 1. The mixture contains up to 95 wt% silicon carbide. Claims 2-6 do not require thermal spraying. The composite of claim 9 although made by a different process is not patentably distinguishable from the product made by Murata et al. It should be noted that the formed material of the claim encompasses the substrate being removed.

Allowable Subject Matter

3. Claims 7,8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record fails to teach or fairly suggest spray drying the powders and a thermal spraying process.
